

## **The five top human life facts**

Whatever man has in his service, from religion and belief, and politics and management and world order to science and knowledge and culture, and economy and business and trade ... are all the facts of human life! (I.e. they are affairs that have shown and proven their righteousness and finality and have been accepted as final and definite affairs) and we can't take a part and delete another part from human life and claim that human life is complete and perfect! Without any of these and even imbalance in equality, transposition, and importance and equality among them human life won't be complete! It can be said that by ignoring them or paying less attention to their role and importance in establishing *a complete human life* mankind will be facing numerous dilemmas, which will cause imbalance in his life and cause a variety of problems and struggles in his life!

*There are five main and principle facts in human life* and each of them include several subgroups, such as maintaining world peace and security which is one of the subgroups of the unit of politics, and or tourism which is one of the subgroups of the group of culture, and or hygiene which is one of the subgroups of the group of science (Based on the management of Worldwide Standard Human Society).

*These top five human life facts are:* 1/ Religion and belief and rituals and human beliefs, 2/ Universal politics and management and order, 3/ Culture and art and rituals and customs and all the beauties of human life, 4/ Human science and knowledge, 5/ Universal human economy and work and trade.

*These five facts complete one another and a correct and complete human life is only possible through the accumulation of these five facts and through the si-multaneous cooperation and unity of them in a unified human group.*

Naturally if any of these five facts deviate from their origin and original and ideal form they will become disgusting and painful and a catastrophe! But thinking of eliminating or ignoring each of them with the presumption of them becoming tarnished with Satanic weaknesses and darkness (The power seeking and penetration of the Satanic 10% in them) is wrong and a clumsy act.

*(The better man distinguished the truths ruling his life, the better life he can form for himself).*

These top five facts ... each make up a major part of human life which find their identity next to each other and in cooperation and balance with one another; imagine a painter who wants to draw the landscape of human life and wants to delete each of these facts and ignore them! This is an impossible task, because:

1/ **Religion and belief**, are the sky of the landscape of human life, how can we imagine a complete human life without a sky!

2/ **Politics and management**, are the order of the universe and the order of human life, how can we imagine human life without order and management and politics!

3/ **Culture and art**, are the beauty and joy, and pattern and color of human life, how can we imagine human life without pattern and color and design!

4/ **Science and knowledge**, are growth and know-ledge, and science and progress of human life, how can we imagine human life without science and knowledge and progress!

5/ **Economy and trade**, are job and prosperity and welfare and comfort of human life, how can we imagine human life without the activity of a dynamic economic system to the welfare of mankind!

Hence these five elements are the five top facts of human life; ignoring or paying less attention to each of them in human life is a clumsy act and has roots in schism and enmity and the penetration of the 10% Satanic in order to make human life painful! The Satanic 10% tries to dominate over these five top facts of human life and tarnish them with all types of enmity and schism and ignorant darkness, in order to darken human life and act in a way that he can't take advantage of the abundance of these true human blessings! ....

The 10% ignorant and prejudiced, selfish and arrogant and power seeking and anti-human are Satanic and by dominating over these human blessings they have inflicted pain over human beings as much as possible in the course of history and made his life hell; these five top human life facts have been tools in the hands of the Satanic 10% to sow seeds of discord and enmity among human beings and keep him in pain and darkness till eternity, as the Satanic 10% are the enemy of the 70% sage, as the Satan is the enemy of man, as badness is enemy of goodness, as lies are enemy of truth, as darkness is enemy of light; and this enmity lasts forever, and until mankind has not reached his human unity he will not be able to commence a life worthy of himself on this Earth and reach the higher levels of his life and ascend!

The Satanic 10% (The ignorant, the selfish and the power seeking) put their hands on religions and make them their own; they put their hands on political centers of power and make them their own; they put their hands on cultures and make them their own; they put their hands on science and knowledge and make them their own; they put their hand on the riches and economy and business of the world and make them their own; so that by making changes in them they eradicate their benefit and purity; through power and politics they increase their penetration and dominance over the world, by penetration over religion and beliefs they take them towards schism and weaken them in order to destroy human unity and weaken the great power of the 70% facing them; through superstitions and world worshipping customs and rituals which are all nihilistic they tarnish the nice picture of human life, they employ incompetent managers for the governments of developing countries to fight development of science and knowledge and by keeping nations illiterate, they keep the academic and social growth of nations slow and keep them exploited and finally by putting

hand on the riches of the world they make him poor and hungry and needy and weak to inflict pain on him and as a result take revenge of mankind; because they are jealous of the 70% (Humans) and don't want and can't see their superiority! These five facts are the most important tools through which the power seeking ignorant dominant maneuver over them and by using them make human world a place to dominate and rule over!

*(The Satanic 10% are ignorant and prejudiced people who want more than they have and by dominating over all that mankind has, lead to his pain and poverty and lag; development of science and knowledge and strong and multilateral human management are among the most important solutions for eradicating the dominance and governance of these ignorant and arrogant people).*

Standard humanism is a thought which goes beyond religion, politics and culture and has the role of cleansing and purifying and guiding human life with the goal of the complete life which is worthy of mankind; **the goal of Standard Human and Standard Humanism is cleansing the top five human life facts from impurities and improbity which have been inflicted by the Satanic 10% and as a result guiding human life towards whatever he is worthy of and forms his healthy life.**

#### ***Negative forms of the five facts:***

1/ Religion and belief incline to: I am right and the others are wrong! 2/ Politics and management go to power-seeking! 3/ Culture and rituals go to superstition! 4/ Lack of Science and knowledge go to slavery! 5/ Economy and trade go to money and world worshipping! *(Standard Humanism & Worldwide Standard Human Society will protect and purify the 5 top facts of human life).*

***The philosophy of Standard Human is the phi-losophy of overall wisdom and human unity!*** This way of thought by applying the best policy and international management, the best and most peaceful human religions and beliefs, the best and most beautiful cultures, and also having science and knowledge and bountiful and rich economy, can be more successful at making his human world.

Imagine a gardener who wants to design a garden in its most ideal form and nurture the most beautiful flowers in it, under these circumstances positive energy and honesty and his human motivation, his management and order and system, his resources, his knowledge on flower planting, and finally the beautiful design of the garden building and his greenhouse prove that he is stepping in the right path and he will build his flower garden and his world in the best possible way; all these proves that he has enough knowledge of his environment and can manage and lead the world that surrounds him ....

The Universal Society of Standard Human with the above mentioned positive attributes is the only organization which deserves to manage and as a result improve the life that is worthy of mankind; scientific, religious, political, economic & cultural permeations and their cleansing through this universal organization is the best path through which the countries in the world can find solutions to their improvement and growth and development.

***The reason human world beliefs and thoughts insisted on unification of mankind was that by friendship and cooperation and unification in all aspects of life one can build human world; but the schism resulting from the penetration of the Satanic 10% among the group that was not unified in their beliefs has been a reason for this not ever happening;*** Standard Human philosophy gives us the chance to target the root of the problems and by getting equipped with the principles of Standard Humanism and by maintaining the sovereignty of nations and cultures and beliefs we all reach a human unity through which Human world can be guided towards its ideal form.

***The method Standard Human has for unifying is unlike past traditional methods and is a new and modern one which has been formed based on observing the right of all the people in the world and not the right of just a group of people in the world;*** the universal management of Standard Human through Universal Society of Standard Human is a universal and fundamental management, which covers the whole world and all the aspects of human life with its method of strong management which is fundamental and humanistic and corrects and turns it over ....
